Given that WoTC released the Mystic on DMs Guild this month, it's no surprise that there have been a lot of new products making use of psionics. Personally, I *love* psionics in my game, so I've been very happy with that development. Still, I've tried to provide a nice variety of products here, since I know not everybody is as enthralled with psychic abilities in D&D as I am!

I hope you'll find something you like here. Although many of these products are Pay What You Want, I hope you'll consider chipping in a little something to support these authors. I also released two products myself this month which I hope you'll find the time to check out. The first was my [map of Chult](#), followed by my [second book of trinkets](#).

Anyway. Here we go!
