Welcome to June's DMs Guild roundup! Every month I gather together some of the best new releases from the DMs Guild. You won't find many bestsellers here; the huge amount of new content appearing daily means that lots of great work slips through the cracks. It's my aim to shed some light on those undiscovered gems, and to give you some fun new things to use in your games that you might not otherwise be aware of.

This month saw a lot of tie-in releases for *Mordenkainen's Tome of Foes*, which is unsurprising. For me, at least, that's a good thing, since I really enjoy planes-related material. I've tried to include a variety of products, though, since I know that isn't everybody's cup of tea.

There were also a lot of new products released with Print on Demand options this month, which is something I'm really excited about. Where those options are available for products I've featured here I've tried to remember to mention it in the review, but all of the links go to the PDF versions since they're the ones that I've read.

With all that out of the way - here are my picks!
